Distributor Partners:

There continues to be more domestic demand than domestic supply of metal in North America. The increasing deficit of domestic aluminum production has caused various components of the pricing and production of aluminum to increase. Along with rising raw material costs, freight and packaging costs have also continued to rise.

As a result of these increases, we will need to adjust our prices effective February 25, 2015. All shipments on or after March 2, 2015 will receive a price increase in the amount of:

- An average of 7% on all aluminum products
- Up to 7% on all steel products except:
 - TruCedar® boxed Steel Siding
 - Matterhorn® Metal Roofing
- Gutter Coil will continue to be priced on a monthly basis

In an effort to continue to improve the customer experience, we are announcing a new freight policy that is easy to understand, allows the supply chain to level-load and improves the reliability of our service platform to you.

Additionally, we have also implemented Lean manufacturing processes in our plants during the past few months. These optimization efforts will allow us to improve upon our service platform and minimize future cost increases to you, our customer, as we continue to take more waste out of the business.

Your sales representative will be contacting you in the coming weeks to discuss these changes, review your pricing and answer any questions you may have.

We sincerely appreciate your loyalty and are committed to providing you with the best products, innovations and service platform.

Kind regards,

Monica Pritchard
